

Tiny House Aquaponics: Raising Fish and Growing Vegetables in Your Small Space (Paperback)

By Zachary Buckler

Createspace, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. Aim For Self-Sustainability And Financial Security With Tiny Homes And Aquaponics! Now You Can Forget About Paying Off Debts and Mortgages By Building Your Own Tiny Home and Raising Fish and Vegetables In Your Space!!! The tiny house movement is an emerging and growing trend in architecture and home design. It has been present in the real estate market for years but has now only grown to become the latest craze in the architectural world. Many people have decided that less is actually more, and even more are beginning to downsize their living to create a more suitable and much affordable lifestyle. Meanwhile, aquaponics is an innovative technology used to raise fish and to grow plants for the purpose of producing food. It allows the practitioner to become independent in terms of his food resources and in this sense, it becomes a very sensible complement to the goal of the tiny house movement. In this book, you will learn more about the history of both the tiny house movement and the aquaponics technique. It will also show you...
