By Francis Ysidro Edgeworth

Forgotten Books, United States, 2016. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Mathematical Psychics an Essay on the Application of Mathematics to the Moral Sciences The application of mathematics to Belief, the calculus of Probabilities, has been treated by many distinguished writers; the calculus of Feeling, of Pleasure and Pain, is the less familiar, but not in reality more paradoxical subject of this essay. The subject divides itself into two parts; concerned respectively with principle and practice, root and fruit, the applicability and the application of Mathematics to Sociology. Part I. In the first part it is attempted to prove an affinity between the moral and the admittedly mathematical sciences from their resemblance as to (1) a certain general complexion, (2) a particular salient feature. (1) The science of quantity is not alien to the study of man, it will be generally admitted, in so far as actions and effective desires can be numerically measured by way of statistics - that is, very far, as Professor Jevons anticipates.
