Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Uniform Accounts for Systems of Water Supply Sir: I have the honor to transmit herewith a monograph presenting a scheme of uniform accounts for systems of water supply, arranged at a conference of, and by correspondence between, representatives of the Bureau of the Census, American Water Works Association, New England Water Works Association, American Association of Public Accountants, Ohio Bureau of Uniform Accounting, and others interested in the subject. The object of this conference was to devise a system of accounts that would be adequate for setting forth a complete statement of financial transactions covering the revenues, expenses, and outlays of water-supply systems, and accurately accounting for their assets and liabilities. The difficulties heretofore encountered in the comparative study of municipally owned and privately owned water-supply systems suggested the desirability of a uniform system of accounts applicable to both classes of enterprises. The activity of the Bureau of the Census in this matter arises from its desire to present in its annual reports on statistics of cities data for municipal water works which may be of the greatest possible value to municipalities, to the general public, and to students of this subject. In the preparation of this scheme of uniform accounts for water-supply systems the Bureau of the Census was represented by Mr. Le Grand Powers, chief statistician in charge of statistics of cities, and through his efforts, in a very large degree, the work was brought to completion. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
